Innovations for Life Science
Since 1990

Innovations for Life Science

For 30 years, Scientific Specialties has focused on bringing innovative, high-quality plasticware to life science. Our founder and CEO is a Ph.D. Biochemist who understands the specific needs and challenges of laboratory research and incorporates that knowledge into products that make your work easier and more successful.

Because of our commitment to innovation and quality, laboratories around the world have come to rely on our plastic consumables for everyday research as well as ground-breaking discoveries.

Made in USA

Every product in this catalog is proudly manufactured in the USA.

Purity Assured

Products are certified free of detectable RNase DNase, DNA, PCR inhibitors, and tested pyrogen-free. Sterile product is certified pyrogen-free.

Recyclable

Product is fully compliant with recycling standards.

Autoclavable

Where specified, products may be sterilized at 121°C and 15 psi for 15 minutes.

Scientific Specialties, Inc.
Lodi, CA USA

Competence

Our processes are controlled under a certified ISO-9001 quality assurance system. From the initial concept of a product to its finished form, we control all aspects of the design, production and quality in our state-of-the-art manufacturing facility, located in Lodi, California. We are one of the few producers of laboratory plastics still manufacturing in the USA—an important distinction between SSIbio and other brands.

Excellence

All products are manufactured in our 11,300 square-meter (122,000 square-foot) facility. This includes 3,700 square meters of dedicated clean, climate-controlled industrial space—of which, 1,500 square meters will be formally certified to ISO 8 / Class 100,000 standards. This ensures that all production and packaging are performed in an environment that meets rigid cleanroom specifications.

Quality injection molding, coupled with the integration of robotics, and our rigorous QA/QC processes demonstrate our commitment to excellence and guarantee product that is uniform, pure, and worthy of your trust.

Partnership

At Scientific Specialties, we know that having a reliable partner is important to our success. That is why we have built a business on also being the right partner to our customers. As a privately-held entity, we are able to make decisions and invest in equipment and other innovations to be more productive and responsive to the needs of our customers.

An Experienced Manufacturing Partner You Can Trust

Consistently producing high-quality products for 30 years is no accident. Since our founding, we have been driven by a desire to produce products that make research easier. Because of our commitment to innovation and excellence, laboratories around the world have come to rely on our plastic consumables for their everyday research as well as ground-breaking discoveries.

Innovation

Eight design patents attest to our passion for innovation and are incorporated in daily-use laboratory products that enhance or simplify user experience.

Triple-Interwell Linkages and Angled Caps revolutionized strip tubes, resulting in less spillage and more research.

Pipette tip grid with lock mechanism simplified easy reloading of empty racks.

Press-to-Open Rack Lid enabled easy one-handed operation.

Purity & Clarity

Our commitment to high-quality plastics has made us a leader in PCR consumables where optical clarity and purity are critical, and is evident in all of our other products as well. You can be assured that every consumable product you purchase from SSlbio will be free of detectable DNase, RNase, DNA, and PCR inhibitors and, for those products which are sterile, we employ E-beam sterilization to eliminate pyrogens and ensure absolute purity.

Quality

All products are required to pass rigorous laboratory testing before sale. A Certificate of Conformity and Analysis is available that defines the testing protocols followed. This is your guarantee of quality and satisfaction.

All processes—from design to production and packaging—are controlled under a certified ISO-9001:2015 Quality Assurance system. Select product also conforms to CE Council Directives 93/42/EEC and 98/79/EEC.

Expertise

Significant investment in automation ensures uniform product and eliminates the risk of human-borne contamination.

The use of **automated inline robotics, vacuum testing, and optical inspection** identifies and eliminates non-conforming product.

Our molds, made from the finest stainless steel, are designed for long-term performance. Regular, in-house maintenance ensures reliable production and dependable lead times.

Control

Every production lot is quality tested for physical and chemical compliance to rigorous standards in our well-equipped, state-of-the-art quality assurance laboratory.

All shipments include the manufacturing lot number so that, in the unlikely event of a problem, the code can be traced back to the exact production date and the very mold that was used to produce the part to identify root cause.

Injection molding expertise and in-house craftsmanship ensure reliable machine performance to produce consistent parts.

Cleanroom Production to Class 100,000 Standards

All products are manufactured in our 11,300 square-meter (122,000 square-foot) facility.

UltraFlux®

The UltraFlux Story

UltraFlux® PCR Consumables have been a laboratory staple around the world for more than 25 years. Beginning with a patent granted for the design of SnapStrip® tubes with angularly attached caps, the UltraFlux line has been continuously innovated and improved over the past two decades to provide reliable results and tremendous value.

Advantages of UltraFlux and SnapStrip Tubes:

Angular Cap Attachment

- Angularly attached caps on UltraFlux® i and SnapStrip® tubes prevent cap lids and hinges from interfering with each other, allowing for easier operation in an SBS format rack.

Ultra-Thin Walls

- Ultra-thin walls ensure efficient thermal transfer and maximum yield, yet are strong enough to prevent crushing.

Tube Color and Clarity

- Clear tubes provide high clarity for visualizing contents.
- White tubes are available with optically-clear caps, thanks to proprietary two-material manufacturing. The white wells offer enhanced fluorescence reflection and the optically-clear caps ensure that the fluorescence signal is passed through uninhibited, creating the perfect environment for consistent and reliable qPCR performance.

Optically-clear caps ensure that the fluorescence signal is passed through uninhibited.

SnapStrip single interwell linkage makes strips easy to split into smaller sections.

Unique **two-material manufacturing** creates the perfect environment for consistent, reliable qPCR performance.

White tubes offer enhanced fluorescence reflection.

UltraFlux PCR Strip Tubes & Strip Caps

UltraFlux® i

- Robust interwell linkages make the strips rigid and easy to handle, preventing spills.
- Angularly attached caps prevent lids and hinges from interfering with each other, allowing for easier operation in an SBS format rack.
- Unique two-material white tubes with optically-clear flat caps create the perfect environment for consistent, reliable qPCR performance. White wells offer enhanced fluorescence reflection and optically-clear caps ensure that the fluorescence signal is uninhibited.
- Colored tubes offer easy organization. Dual-colored with optically-clear flat caps to ensure that the fluorescence signal is uninhibited for optimum qPCR performance.
- Certified free of detectable RNase, DNase, DNA, PCR inhibitors, and tested pyrogen-free.

UltraFlux PCR Tubes

Individual PCR Tubes

- Individual PCR tubes feature evaporation-resistant, easy-to-open-and-close lids that prevent sample loss.
- Ultra-thin, uniform wells ensure optimal heat transfer and reaction efficiency.
- Conveniently packaged in reclosable bags to minimize risk of contamination.
- Available in ultra-clear, assorted, or specific colors.
- Certified free of detectable RNase, DNase, DNA, PCR inhibitors, and tested pyrogen-free.

UltraFlux PCR Plates

UltraFlux® PCR Plates are available in a wide variety of styles to fit most thermal cyclers on the market. Each is designed to meet or exceed the specifications and performance of plates supplied by the original equipment manufacturer.

Advantages of UltraFlux Plates:

Broad compatibility with popular thermal cyclers

- Online plate selector guide makes it quick and easy to find your ideal plate.

Ultra-thin, uniform wells

- Optimal heat transfer and higher reaction efficiency.

A variety of plate sealing options

- Film, foil, silicone mats, and strip caps prevent evaporation.

UltraFlux Plate Features

High-contrast, black alphanumeric indexing.

Raised wells ensure optimal sealing to prevent evaporation.

Skirt options

Full-Skirted

Non-Skirted

Ultra-clear wells for easy sample visualization.

Custom bar-coding available.

Semi-Skirted

UltraFlux PCR Plates

- Broad thermal cycler compatibility.
- High-contrast, black alphanumeric indexing for easy well identification.
- Crystal-clear wells to easily verify sample volume.
- Ultra-thin, uniform wells ensure optimal heat transfer for high reaction efficiency.
- Well ridges reduce sample evaporation when sealing with film, foil, or strip caps.
- Bar-coded semi-skirted and full-skirted plates available.
- Manufactured from high-clarity, ultra-pure polypropylene (meets FDA 21 CFR 177.1520 & USP Class VI).
- Non-skirted item 3410-00 is also available in 24 and 48 well size options. Please inquire for more details.
- Certified free of detectable DNase, RNase, DNA, PCR inhibitors, and tested pyrogen-free.

UltraFlux PCR Plate Sealing

- 8-strip and 12-strip caps are ideal for sealing specific sections of plates.
- Sealing mats, film, and foil enhance full-plate sealing and analysis.
- Create an evaporation-resistant seal to minimize sample loss.
- All options are certified free of detectable RNase, DNase, DNA, and PCR inhibitors.
- Films and foils feature perforated end tabs for easy application and simple removable.

UltraFlux® PCR Film

- The perfect choice for endpoint PCR work.
- Made from clear polypropylene, with an acrylic adhesive.
- Temperature range: -40°C to +120°C.

UltraFlux® RT Film

- Ultra-clear, polyester film with maximum clarity for optical analysis during qPCR.
- Most cost efficient option for real-time PCR plate sealing.
- Medical-grade adhesive goes on smoothly and is non-absorbing and non-fluorescing.
- Temperature range: -40 °C to +120 °C.

UltraFlux® RT Pressure-Released Film

- Clear, polyolefin film with a strong silicone adhesive for an evaporation-resistant seal.
- Adhesive remains inert until pressed against the plate surface, leaving the well area free of residue.
- Temperature range: -70 °C to +100 °C.

UltraFlux® Foil

- Pierceable.
- Soft and malleable—easily conforms to the rim of the well for a secure seal.
- Temperature range: -80°C to +120°C.

UltraFlux films are easy-to-use, economical solutions for sealing PCR plates.

UltraFlux strip caps are an excellent option for plate sealing. See page 8.

The Peak of Pipetting

The Highest Level of Liquid Handling Control

Vertex® Pipette Tips were meticulously designed using a proprietary resin that provides researchers with exceptional liquid handling performance. Even the Vertex Value tip range outperforms competitive tips in the areas of release and retention. Plus, thinner walls and finely tapered ends prevent the need to touch-off when pipetting the last drop.

With Vertex Pipette Tips, Less Is More!

- Less fluid retention
- Less sample loss
- Less time spent
- Less plastic wasted

Clean Liquid Release

Vertex tips deliver a much cleaner liquid release, dispensing all of the sample and improving pipetting accuracy. Users will maintain complete fluid control, even when working with smaller volumes, while not compromising the accuracy and precision of their pipetting.

Low Retention

All Vertex tips are designed to be naturally low-binding, but tips with NoStick® resin are considerably more hydrophobic than standard tips, enabling even viscous fluids to be dispensed more completely.

The NoStick symbol indicates products that are made with proprietary resin technology to facilitate exceptionally clean release.

Less is more!

Filtered Tips

Vertex Filtered Pipette Tips offer an extra level of protection, confidence, and control by providing a barrier between the nose cone of the pipettor and the sample.

Advantages of the Vertex Filter Membrane:

- Manufactured from high-density, inert polyethylene (HDPE).
- Contains no additives that can contaminate samples if encountered.
- Provides a barrier against contamination, but will not impede airflow.
- Hydrophobic properties prevent absorption of samples.

Vertex® EcoPac® Refill Systems

Vertex EcoPac® Refill Systems provide handy lift-and-load simplicity, and do not require any tools or special instructions to move from an empty insert to a fresh set of 96 tips. EcoPac Refill Systems are also environmentally friendly, reducing lab waste by 70%, while also conserving precious shelf space.

Paper or Plastic? The choice is yours.

Vertex EcoPacs are available in paper and plastic packaging, to suit your application as well as your preferred recycling method.

EcoPac Benchtop

The EcoPac Benchtop Refill System is housed in paperboard packaging that may be preferred by some institutional recycling programs. Inside, you will find tip refills of the highest Vertex quality and low-retention technology.

EcoPac Cleanroom

The EcoPac Cleanroom Refill System is housed in clean and durable plastic (PET) packaging to protect the tips from damage and eliminate particulate matter.

The Vertex Rack

Vertex racks are made robust and designed to withstand multiple autoclave cycles.

Racks are labeled with volume and lot information for easy identification. Plastic labels are autoclavable and 100% recyclable.

Vertex inserts are produced in volume-specific colors, making them easy to identify and replace.

Patented, press-to-open rack technology enables easy one-handed operation while also remaining securely closed when not in use.

The Vertex rack was designed to facilitate offset pipetting and accommodate multichannel pipettors.

Vertex Value Pipette Tips

Vertex Value Tips are suitable for applications or samples that do not require the ultra-low retention properties of tips made with NoStick® resin.

- Universal fit to accommodate most pipettor brands.
- Available in racks, reloads, and bulk.
- Manufactured from virgin polypropylene to ensure purity and provide excellent optical clarity.
- Certified free of detectable RNase, DNase, DNA, PCR inhibitors, and tested pyrogen-free. Sterile product is certified pyrogen-free.

Vertex-GL Gel-Loading Tips

Vertex-GL Gel-Loading Pipette Tips are designed for precise and accurate sample loading into gels.

- Round or flat tip options to meet all customer preferences.
- Patented press-to-open racks provide easy, one-handed opening.
- Universal fit to accommodate most pipettor brands.
- Multichannel-friendly with a standard 96-tip arrangement.
- Small pack sizes—preferred by more researchers.
- Certified free of detectable RNase, DNase, DNA, PCR inhibitors, and tested pyrogen-free. Sterile product is certified pyrogen-free.

Multi-Volume XL Pipette Tips

- Extended length (91 mm / 3.58 inch) to easily reach the bottom of 12 x 75 mm tubes without risking contamination to the pipettor nose cone.
- Compatible with 20, 100, and 200 µL pipettors (and 300 µL non-filtered).
- Filter placement is optimized to accommodate 20, 100, and 200 µL pipettors; non-filtered tips are also compatible with 300 µL pipettors eliminating the need to keep multiple tips in inventory.
- Universal fit for compatibility with most major pipettor brands.
- Vertex NoStick® resin technology creates a low-binding surface for maximum sample recovery.
- Graduations at 10, 50, 100, 150, and 200 µL.
- 96-tip format in a hinged, locking rack that easily accommodates multi-channel pipettors.
- Certified free of detectable RNase, DNase, DNA, PCR inhibitors, and tested pyrogen-free. Sterile product is certified pyrogen-free.

DuraTubes™ High Impact Tube & Cap Assemblies

Homogenization calls for a tube that is built to withstand the rigors of lysing applications. So when you need to be sure about the tube you select for lysing and bead beating, choose the brand that has the experience, innovation, and reliability of an industry leader: SureSeal DuraTubes from SSIbio.

Advantages of SureSeal DuraTubes:

- Manufactured from a proprietary resin that is specially-formulated for bead-beating applications.
- Shatter-resistant—they're up to the task!
- Secure O-ring seal ensures a tight seal.
- Ultra-pure polypropylene meets FDA 21 CFR 177.1520 & USP Class VI.
- Graduated every 100 µL for easy volume estimation.
- Self-standing skirted base.
- Certified free of detectable RNase, DNase, DNA, PCR inhibitors, and tested pyrogen-free.

2641-0B	2.0 mL Graduated DuraTubes & Caps, Assembled	200/unit, 5 units/case

Choose DuraTubes!

Don't risk your research to a regular microtube!

Standard tubes don't hold up under homogenization.

The proprietary polymer used in DuraTubes allows them to withstand more than twice as much homogenization time in bead beating applications, compared to other popular screw cap microtubes.

NO risk of sample loss

Screw Caps with Molded O-Rings

Purity & Security Molded In!

New technology molds the O-ring directly into the cap, eliminating potential contamination from outsourced O-rings or operator handling.

Microcentrifuge Tubes

Pirouet™ Centrifuge Tubes are the trusted choice in laboratories all around the world, for applications ranging from 0.5 mL to 50 mL. It all begins with a proprietary, ultra-pure resin that ensures optimal clarity, purity, and strength. Plus, over two decades of research and innovation have been instilled into these tubes, resulting in a product that performs to expectation and provides tremendous value.

Advantages of Pirouet Microcentrifuge Tubes

Clarity.

Ultra-Pure, virgin polypropylene delivers crystal clarity and improves visibility.

Graduations.

High-contrast graduations facilitate more accurate volume estimation.

Sample Recovery.

Select styles feature NoStick® resin technology to ensure optimum sample recovery.

Easy to open and close.

Cap design facilitates a simple yet secure seal.

Tubes shown in actual size.

Pirouet™ 0.5, 1.5, and 2 mL Microcentrifuge Tubes

- Two cap styles to suit customer preference:
 - Boil-proof caps are ideal for rigorous high-temp applications and tight storage conditions.
 - Large, boil-resistant caps are easy to open & close, with a large labeling surface.
- Crystal-clear polymer facilitates visualization of samples.
- Rated to 20,000 x G.
- Graduations at every 100 µL for easy volume estimation.
- Available with proprietary NoStick® resin to ensure maximum sample recovery.
- Temperature range: -80°C to +121°C.
- Certified free of detectable RNase, DNase, DNA, PCR inhibitors, and tested pyrogen-free. Sterile product is certified pyrogen-free.

Pirouet 5 mL Microcentrifuge Tubes

Pirouet™ 5 mL microcentrifuge tubes are the perfect intermediate volume option between traditional microcentrifuge tubes and 15 mL conical tubes.

- Suitable for all rotors and racks that hold 15 mL conical tubes—no adapters needed.
- Graduated every 250 μ L for easy volume estimation.
- Rated to 25,000 x G for high-speed centrifugation.
- Flat, frosted cap and a writing surface on the side of the tube.
- Temperature range: -80°C to 100°C.
- Certified free of detectable RNase, DNase, DNA, PCR inhibitors, and tested pyrogen-free. Sterile product is certified pyrogen-free.

15 and 50 mL Centrifuge Tubes, Sterile

- High-clarity, medical-grade polymer.
- Graduations every 1 mL (15 mL tube) or 5 mL (50 mL tube) increments.
- Centrifugation rating:
 - 15 mL tubes to 17,000 x G.
 - 50 mL tubes to 20,000 x G.
 - 50 mL skirted-base tubes to 12,500 x G.
- Temperature range: -80° to 40°C.
- Sterile and certified free of detectable DNase, RNase, DNA, PCR inhibitors, and pyrogens.

CryoFreeze Tubes and cap inserts are autoclavable.

- Ultra-pure polypropylene meets FDA 21 CFR 177.1520 & USP Class VI.
- Tubes comply with the In Vitro Devices Directive (IVD). **IVD**
- Contrasting black 100 µL graduations are bold and easy to read.
- Large white writing area on all tubes.
- Optimized for vapor-phase liquid nitrogen storage.
Note: not suitable for immersion in liquid nitrogen.
- Available with round base or self-standing Stargrip™ base.
- Temperature range: -196°C to 121°C.

Resealable, Stand-Up Packaging is clean and convenient.

Cryogenic Tubes & Caps

CryoFreeze® Tubes with Internally-Threaded Caps

- Polypropylene cap has silicone rubber O-ring for a secure, leakproof seal.
- Maximize tube storage within racks, boxes, and canes.
- Sterile and certified free of detectable DNase, RNase, DNA, PCR inhibitors, and pyrogens.

CryoFreeze Tubes with Externally-Threaded Caps

- HDPE cap has secure, lip-seal feature so no O-ring is necessary.
- External threads reduce contamination and cross-contamination potential.
- Sterile and certified free of detectable DNase, RNase, DNA, PCR inhibitors, and pyrogens.

Citadel™

Deep Well Plates

Ideal for sample collection, preparation, and long-term storage.

Citadel™ Deep-Well Plates and Cluster Tube Systems are ideal for high-throughput screening processes and long-term storage. It all begins with high-clarity, ultra-pure polypropylene, combined with proprietary injection molding techniques to produce high-clarity vessels that are exceptionally robust, chemically-resistant, and pure.

- HTS-friendly—compatible with most liquid-handling robots.
- Centrifugation to 4,000 x G.
- Manufactured from virgin polypropylene to ensure purity and sample integrity, chemical resistance, and compatibility with long-term storage needs.
- Alphanumeric indexing molded in on A-H and 1-12 axes.
- Optimum sample mixing and recovery with highly-polished wells and radiused corners.
- Raised rims on each well facilitate secure sealing with films and sealing mats.
- Bar coded plates available—please inquire.
- Certified free of detectable RNase DNase, DNA, PCR inhibitors, and tested pyrogen-free. Sterile product is certified pyrogen-free.

Flipper® Racks have been a mainstay of laboratories around the world for 30 years. The innovative design of Flipper Racks provides researchers with greater flexibility on the bench without managing multiple racks. From the basic 4-Way Flipper rack design to the Sliplock and Revolver, researchers are sure to find the ideal Flipper Rack for their lab.

4-Way Flipper Racks

- Small footprint is perfect for the benchtop or under the hood.
- Suitable for use in ultra-low temperature freezers (-90°).
- Available in standard or interlocking versions.
- Accommodates all popular tube sizes, from 0.5 mL to 50 mL, and 20-25 mm.
- Rugged polypropylene construction.

Press the interlocking racks together to form a larger, custom rack.

IsoFreeze®

IsoFreeze Color Change Racks

- Maintain a sample temperature of less than 4°C for up to 4 hours (varies by model) when used at room temperature.
- Color change material enables you to see how cold your samples are at a glance.
- IsoFreeze color change racks undergo a dramatic change to a contrasting color at 7°C.

NEW! IsoFreeze qPCR
Specially designed for
Qiagen®/Corbett Rotor-Gene® tubes.
See page 9 for Corbett Tubes.

Gradual fade in color
indicates slowly rising
sample temperatures.

Blue rack color indicates safe
sample temperature.

IsoFreeze® PCR Racks

- Tube and plate capacity:
 - qPCR: 64 x 0.1 mL Corbett Rotor-Gene tubes, 16 x 0.2 mL tubes or strips, and 4 x 0.5 mL tubes.
 - PCR: 96 x 0.1 and 0.2 mL tubes and strip tubes; plates up to 96-well.
- Dimensions: 141 × 99 × 44 mm.

Item #	Description	Cold to Warm Color Change	Est. Time below 4°C	Packaging
5660-TW	qPCR Rack	Blue to White	2.5 Hours	2 racks/unit, 5 units/case
5640-T4	PCR Rack	Purple to Pink	3+ Hours	
5640-T6	PCR Rack	Green to Yellow	3+ Hours	

IsoFreeze® PCR, SBS

- SBS footprint for use with liquid handling equipment.
- Accommodates 96-well PCR plates, strip tubes, or 0.2 mL tubes.
- Rack does not come with lid.

IsoFreeze® Flipper Racks

- IsoFreeze temperature maintenance racks. Lid included.
- Consistent thermal protection.
- One side holds 20 x 1.5/2.0 mL tubes, and the other side holds 20 x 0.5 mL tubes.
- Tough polycarbonate material.
- Dimensions: 172 x 104 x 108 mm.
- IsoFreeze Flipper is available in two temperature ranges:
 - Blue -20°C unit will maintain a temperature between -10° and -20°C for up to 3 hours.
 - White 0°C unit will maintain a temperature of 0°C for a minimum of five hours.
- Racks are filled with an inert, non-toxic gel.

PCR WorkUp Racks (Standard & Stacking)

PCR Stacking WorkUp Rack — New and Improved!

- Easy stacking.
- Lid clicks into place.
- Stable work platform.
- Accommodates non-skirted, semi-skirted, and skirted 96-well PCR plates.
- Accommodates PCR strip tubes.
- Rugged polypropylene construction.
- Operating temp: -80°C min to 121°C max.
- Assembly comes with lid.
- Rack capacity options:
 - 1 x 96 well PCR plate.
 - 90 x 0.2 mL PCR tubes.
 - 12 x 8-strip tubes.

Item #	Description	Dimensions	Colors	Packaging
5240-09	Stacking 96-Well PCR WorkUp Rack and Lid	138 × 98 × 39 mm, 30 mm without Lid	Assorted Standard ¹	5 racks/unit, 4 units/case
